Summary

1. We are about to see take-up of the LIXI 2 standard from a number of participants. The impact of this change will flow to the earlier adopters and their business partners.
2. Those who stay with the CAL 1.x standard and their partners will not experience any significant change as a result. It will be business as usual.
3. There will be missed opportunities for those who do not step up to LIXI 2, not through LIXI, but through the market.

2016 is looking very exciting for LIXI and the Lending Industry.
