

Challenges and success factors for an awesome open banking strategy

James Bligh

www.data61.csiro.au

My background

- **Previously worked at NAB**
 - Delivered the first banking OAuth implementation in AU
 - Built out the APIs for the NAB Mobile App and other online channels
- **Currently lead of the CDR Technical Working Group**
 - Implementing standards for the consumer data right
 - Focussed on Banking first but then Energy and Telco
 - First full draft published on 2nd November

What makes a good Open Banking strategy?

- Customers want the service, not the data
- Trust is of primary importance
- Keep it clean and clear
- Adaptability and flexibility
