LIXI Conversation Series - 30 July - Sydney

The July LIXI Conversation Series will focus on the business case, benefits and inclusions of the newly released Equipment Finance standard released in May this year. Hosted by the Westpac Group, this event will feature a panel of equipment finance lenders, technology providers and loan managers. These market participants will discuss their involvement in the LIXI Equipment Finance working group and why their organisation chose to support a collaborative, industry approach to data definition. Panelists will outline the business benefits for their organisations and how they expect the LIXI Equipment Finance standard to impact the asset lending industry, their customers and their day to day operations. This is a great opportunity to understand how standards are used across the lending industry and how business silos can be united by standard data, terms & definitions.

This event is free. Please register [here](#).

Standards

JSON Survey

LIXI is conducting industry research as to the use of JSON in the lending industry. Results of this brief survey may result in JSON schema becoming a standing component of LIXI standard package releases. To participate in this survey, please visit this [webpage](#).

Backchannel Working Group

LIXI is asking Member organisations to contact LIXI in regards to improving the Backchannel standard with

LIXI 2.0 Fundamentals

updated requirements. Please [email LIXI](#) to be involved with improvements in regards to Backchannel conditions, statuses and events.

CAL 2.0.7

CAL 2.0.7 was released on May 23rd and contains data required to support an Equipment Finance message. For logged-in LIXI Members and Licensees, the full package release (including a full report of inclusions) can be downloaded [here](#). Visit the LIXI standards release [calendar](#) for current information and monthly highlights.

The new LIXI 2.0 technical training has been a big hit in the lending industry, introducing participants to the principles of LIXI 2.0, providing an overview of the technical architecture and schema design of both CAL 2.0 and the Electronic Guidebook standards. Find out about [in-house training options](#) for your organisation.
